1 Introduction

During our work, we have been taught how to implement Kernel-based Vector Machines for different tasks including : Multiclass classification, hierarchical classification. All of those . In this paper we are going to introduces Structured Support Vector Machines and our work regarding the various implementations.

2 Kernel-based Vector Machines

The Kernel-based Vector Machines [] exposes

3 Structured classification for multimedia Information Retrieval

All throughout this course, we have been evolving from text information retrieval passing by graph. We thus implemented the though the given
